AMERICA FOR GOD.

Dr. Telmage Discourses on the immensity of Our Country.

rapide Description of the Wondard Houndless Resources - How the Continent Is to be Gospelland.

In his recent sermon at the Brooklyn Tab-rmacle, Rov. T. DeWitt Talmage, chose for his subject, "From Ocean to Ocean, or My Pranscontinental Journey." Text: Psalms xxii. 8: "He shall have dominion from sea loss." The eloquent divine spoke as fol-

What two seas are referred to! Some what two seas are referred to Some night say that the text meant that Christ is to reign over all the land between the gubian Sea and Caspian Sea, or between he fled Sea and the Mediterranean Sea, or etween the Black Sea and the North Sea. to; in such cases my text would have named m. It meant from any large body of water on the earth clear across to any other large body of water. And so I have a right to read it: He shall have dominion from the Atlantic Sea to the Pacific Sea. My theme s: America for God! Pirst, consider the immensity of this pos-

Pirst, consider the immensity of this pos-session. If it were only a small tract of land capable of nothing better than sage brush and with ability only to support prairie dogs, I should not have much enthusiasm in wanting Christ to have it added to His dominion. But its immensity and af-fluence no one can imagine unless in immi-grant waron or stage coach or in rail train of the Union Pacific or the Northern Pacific or the Canadian Pacific or the Southern Pacific, he has traversed it. Having been privileged six times to cross this continent, and twice this summer, I have come to some appreciation of its magnitude. California, which I supposed in boyhood from its size on the map, was a few yards acrais, a ridge of land on which one must walk cautiously test he hit his head against the Sierra Nevada on the one side or slip off into the Panific waters on the other; California, the thin alice of land as I supposed it to be in my boyhood, I have found to be larger tiam all the States of New England and all New York State and all Penusylvania added together; and if you add them together their square miles fail far short of California. North and South Dakota, Montana, and Washington Territory, to be on the map, was a few yards acreis, a ridge tans, and Washington Territory, to be launched next winter into statehood, will be giants at their birth. Let the Congress of the United States strain a point and soon admit also Idaho and Wyoming and New Mexico. What is the use keeping them out in the cold any longer! Let us have the whole continent divided into States with Senatorial and Congressional representa-tives and we will all be happy together. If some of them have not quite the requisite number of people, fix up the Constitution to suit these cases. Even Utah will by dropping googgany soon be ready to enter. Monogamy has triumphed in parts of Utah and will probably triumph at this fail election in Salt Lake City. Turn all the Territories into States and if some Sait Lake City. Turn all the Territories into States and if some of the sisters are smaller than the older sisters, give them time and they will soon be as large as any of them. Because some of the daughters of a family may be five feet in stature and the others only four feet, do not let the daughters five feet high shut the door in the faces of those who are only four feet. e faces of those who are only four feet Among the dying utterances of our high. Among the dying utterances of our good friend, the wise statesman and great suther, the brilliant orster and magnificent soul, S. S. Cox, was the expressed deter-mination to move next winter in Congress for the transference of other Territories

into States.

"But," says some one, "in calculating the commensity of our continental acreage you must remember that, vast reaches of our public domain are uncultivated beaps of dry sand, and the "bad lands" of Montana and the great American desert." I am glad you mentioned that. Within twenty-five years there will not be between the Atlan tic and Pacific coasts a hundred miles of tand not reclaimed either by farmer's plow or miners' crowbar. By Irrigation, the waters of the rivers and the showers of siven in what are called the rainy season will be gathered into great reservoirs and through aqueducts let down where and ople want them. Utah is an object lesson. Some parts of that Territory which were so barren that a spear of grass sould not have been raised there in a hun-ired years are now rich as Lancaster County farms of Pehnsylvania, or Westchester farms of New York, or Somerset County farms of New Jersey.

Experiments have proved that ten acres of round irrigated from waters gathered in reat hydrological basins will produce as ch as fifty acres from the do rain as seen in our regions. We have our freshets and our droughts, but in those lands which are to be scientifically irrigated there will be neither freshets nor droughts. As you take a pitcher and get it full of water and then set it on a table and take a water and then sot it on a table and take a drink out of it when you are thirsty, and sever think of drinking a pitcherful all at sice, so Montana and Wyoming and Idaho will eatch the rains of their rainy season and take up all the waters of their rivers in ers of reservoirs and drink out them whenever they will, and refresh eir land whenever they will.

The work has already been grandly begun by the United States Government. Over four hundred lakes have already been offi-cially taken possession of by the nation for the great enterprise of irrigation. Rivers that have been rolling idly through these regions, doing nothing on their way to the sea, will be lassoed and corralled and penned up til such time as the farmers need the be the same processes the Ohio, the Mis ppi and all the other rivers will be the to behave themselves better, and the basins will be made to catch the suras of waters in times of freshet and keep om for times of drought. The irrigating seess by which all the arid lands between Atlantic and Pacificoceans are to be fer-ed is no new experiment. It has been ag on successfully hundreds of years in its, in China, in India, in Russia, in

About eight hundred million of people of the earth to-day are kept alive by food raised on irrigated land. And here we have allowed to lie waste, given up to rattlesnake and but and prairie dog, lands enough to support whole nations of industrious population. The work begun will be consummated. Here and there exceptional lands may be stubborn and refuse to yield any wheat or corn from their hard fists, but if the hoe fall to make an impression, the minor's pick-axe will discover the reason for it and bring up from beneath these unscoductive surfaces coal and iron, and lead and copper, and silver and gold. God speed his geologists and the surveyors, the engineers and the Senatorial commissions, and he capitalists and the new settlers, and the unbandmon who put their brain and hand the increase combant!

But white I speak of the immedity of the attent, I must research to the capitalists of the immediate of the attent, I must research to the capitalists of the immediate of the attent, I must research to the capitalists of the immediate of the attent, I must research to the capitalists of the immediate of the attent, I must research to the capitalists of the immediate of the attent, I must research to the capitalists of the immediate of the attent, I must research to the capitalists of the immediate of the attent, I must research to the capitalists of the immediate of the attention, I must research to the capitalists of the immediate of the capitalists and the capit

an contract!

while I work of the immunity of the mit, I must of more Rubbico as the manual rubbico as the manual rubbico as the manual rubbico as the first section as the first

of construction. What a pity the United of construction. What a pity the United States Government did not take possession of Yosemi's, Cal., as it has of Yellowstone, Wyoming, and of Ningara Falls, New York: Yosemite and the adjoining California regions! Who that has seen then can think of them without having his blood tinglet Trees now standing there that were old when Christ lived. These monarchs of foliage reigned before Cassar or Alexander, and the next thousand area will not shate and the next thousand years will not shatter their sceptor. They are the masts of the continents, their canvas spread on the winds while the old ship bears on its way through the uges. Their size, of which travelers often speak, does not affect me so much as their longevity. Though so old now, the branches of some of them will crackle in the last configuration of the

planet. The valley of the Yosemite is eight miles long and a half mile wide and three thousand feet deep. It access as if it had been the meaning of Omniyo ence to crowd into as small a piece as possible some of the most stupendors accessed to the world. Some of the cliffs you do not stop to measure by feet, for they are literally a mile high. Steep so that neither foot of man nor beast ever scaled them, they stand in everlasting defiance. If Jehovah has a throne on earth these are its white pillars. Standing down in this great chasm of the valley you look up and youder is Cathodral Rock, vast, gloomy minster built for the silent worship of the mountains. Yonder is Sentinel Rock, of the mountains. Youder is Sentinel Rock, 3,270 feet high, bold, solitary, standing guard among the ages, its top seldom touched un-til a bride one Fourth of July mounted it and planted the national standards, and the people down in the valley looked up and saw the head of the mountain turbaned with stars and stripes. Yonder are the "Three-Brothers," four thousand feet high; "Cloud's Rest," North and South Dome and

"Cloud's Rest," North and South Dome and heights never captured save by the flery bayosots of the thunder storm.

No pause for the eye, no stopping place for the mind. Mountains hurled on mountains. Mountains in the wake of mountains. Mountains flasked by mountains. Mountains split. Mountains ground. Mountains fallen. Mountains triumphant. As though Mont Blane and the Adirondacks and Mount Washington were here uttains themselves. Mountains triumphant. As though Mont Blanc and the Adirondacks and Mount Washington were here uttering themselves in one magnificent chorus of rock and precipice and waterfall. Sifting and dashing through the rocks, the water comes down. The Bridal Vall Falls, so this you can see the face of the mountain behind it. Yonder is Yosemite Falls, dropping 2,634 feet, sixteen times greater descent than that of Niagara. These waters dashed to death on the rocks, so that the white spirit of the slain waters ascending in robes of mist seeks the heaven. Yonder is Nevada Falls plunging seven hundred feet, the water in arrows, the water in arrows, the water in rockets, the water in pearls, the water in amethysts, the water in diamonds. That cascade fings down the rocks enough jeweis to array all the earth in beauty, and rushes on until it drops into a very hell of waters, the smoke of their torment ascending forever and ever.

But the most wonderful part of this American continent is the Yellowstone Park. My visit there last month made upon me an impression that will last forever. After all poetry has exhausted itself and all the Morans and Blerstadts and the other enchanting grists have completed their can

Morans and Bierstadts and the other enchanting artists have completed their can-vas, there will be other revelations to make and other stories of its beauty and wrath, splendor and agony, to be recited. The Yel-lowstone Park is the geologist's paradise. By cheapening of travel may it become the nation's playground! In some portions of it there seems to be the anarchy of the ele-ments. Fire and water, and the vapor born of that marriage, terrific. Geyser cones or hills of crystal that have been over 5,000 years growing. In places the earth, throb-bing, sobbing, groaning, quaking with sque-

At the expiration of every sixty-five minates one of the geysers tossing its boiling water 185 feet in the air, and then descending into swinging rainbows. Caverns of pictured walls large enough for the sepul-cher of the human race. Formations in stone in shape and color of calla lily, of helitrope, of rose, of cowslip, of sunflower and of gladiols. Sulphur and arsenic, and oxide of iron, with their delicate pencils, turning the hills into a Luxemburg or a vatican picture gallery. The so-called Thanatopsis geyser, exquisite as the Bryant poem it was named after, and the so called Evangeline geyser, lovely as the Longfel-low heroine it commemorates. The so-called Pulpit Terrace from its white elevation preaching mightier sermons of God than human lips ever uttered. The so-called Bethesda geyser, by the warmth of which invalids have already been cured, the Angel of Health continually stirring the waters. Enraged craters, with heat at five hundred degress, only a little below the surface.

colors, blue as the sky, green as the foliage, crimson as the dahlia, white as the snow, spotted as the leopard, tawney as the lion, grizzly as the bear, in circles, in angles, in stars, in coronets, in stalactites, in stalag-mites. Here and there are petrified growths, or the dead trees, and vegetation of other ages, kept through a process of natural embalmment. In some places waters as inno-cent and smiling as a child making a first attempt to walk from its mother's lap, and not far off as feaming and frenzied and ungovernable as a maniac inmurderous strug-

gle with his keepers.

But after you have was fired along th gevserite enchantment for days and begin to feel that there can be nothing more of interest to you, you suddenly come upon the perdration of all majesty and grandeur, the Grand canyon. It is here that it seems to me—and I speak it with reverence—Jehovah seems to have surpassed Himself. It seems a great guich let down into the eternities. Here, hung up and let down and spread abroad are all the colors of land and sea and sky. Upholstering of the Lord God Al-mighty. Best work of the Architect of worlds. Sculpturing by the Infinite. Maswornan component trowel. Yellow! You never saw yellow unless you saw it there. Red! You never saw red unless you let unless you saw it there. Triumphant banners of color. In a cathedral of basalt, sunrise and sunset married by the setting of rainbow ring.

of rainbow ring.

Gothic arches, Corinthian capitols, and
Egyptian basilicas built beforehuman architecture was born. Huge fortifications of
granite constructed before war forged its
first cannon. Gibraitars and Sebastopols
that never can be taken. Alhambras, where kings of strength and queens of beauty reigned long before the first earthly crown was empearied. Thrones on which no one but the King of Heaven and earth ever sat. but the King of Heaven and earth ever sat. Fount of waters at which the lesser hills are baptized while the giant cliffs stand round as spensors. For thousands of years before that some was unveiled to human sight, the elements were busy, and the gey sers were howing away with their hot chisel, and gisclers were pounding with their cold hammers, and hurricanes were cleaving with their lightning strokes, and salet was giving the fluishing touches, and the call these forces of nature had done their best, in our century the curtain directed and the world had a new and directed happined sovelstim, the Old Testands written on parchment and now this last testament written on the rocks.

Hanging over one of the cliffs I looked off until I could not get my breath, then retreating to a less exposed place I looked down again. Down there is a pillar of rock that in certain conditions of the atmosphere looks like a pillar of blood. Yonder are fifty feet of emerald on a base of five hundred feet of opal. Wall of chalk resting on pedestals of beryl. Turrets of light trabing on floors of darkness. The brown brightening into golden. Snow and crystal melting into fire of carbuncie. Finning red cooling into russet. Cold blue warming into saffron. Dull gray kindling into sciferino. Morning twilight flushing midnight shadows. Auroras crouching among rocks.

forning twings business among rocks.

Youder is an eagle's nest on a shaft of be-Yonder is an eagle's nest ow see among it the young eagles, but the stoutest arm of our group can not hurl a stone near enough to disturb the feathered domesticity. You-der are heights that would be chilled with are with which they are enwrapped. Altars of worship at which nations might kneel. Domes of chalcedony on temples of porphyry. See all this carnage of color up and down the cliffs; it must have been the battle-field of the war of the elements. Here are all the colors of the wall of Heaven, neither the sapphire nor the chrysolite nor the topaz nor the jacinth, nor the amethyst nor the jasper nor the twelve gates of twelve the jasper nor the twelve gates of twelve pearls, wanting. If spirits bound from earth to Henven could pass up by way of this canyon, the dash of heavenly beauty would not be so overpowering. It would only be from glory to glory. Ascent through such earthly scenery in which the crystal is so bright and the red so flaming would be fit preparation for the "sea of glass mingled with fire."

the Yellowstone Park on the morning of August 9, for the most part we held our peace, but after a while it flashed upon me with such power I could not help but say to my comrades: "What a hall this would be my comrades: "What a hall this would be for the last judgment!" See that mighty cascade with the rainbows at the foot of it. These waters congealed and transfixed with the agitations of that day, what a place they would make for the shining feet of a judge of quick and dead. And these rainbows look now like the crowns to be east at his feet. At the bottom of this great canyon is a floor on which the astions of the earth might stand, and all up and down these galleries of rock the nations of heaven might sit. And what reverberation of archangels' And what -reverberation of archangels' trumpet there would be through all these gorges and from all these coverns and over all these heights. Why should not the greatest of all the days the world shall ever see close amid the grandest scenery Omnipotence were built. tence over built?

O, the sweep of the American continent O, the sweep of the American continent! Sailing up Puget Sound, its shores so bold that for fifteen hundred miles a ship's prote would touch the shore before its keel touched the bottom, I said: "This is the Mediterranean of America." Visiting Portland and Tacoma and Seattle and Victoria and Fort Townsend and Vancouver's and other cities of that Northwest region, I thought to myself: These are the Bostons, New Yorks, Charlestons, and Savannahs of the Pacific Coast. But after all this summer's journeying and my other journeys westward in other summers, I found that I had seen only a part of the American continent, for Alaska is as far west of San Francest, for Alaska is as far west of San Francest. nent, for Alaska is as far west of San Fran-cisco as the coast of Maine is east of it, so that the central city of the American conti-

that the central city of the American conti-nent is San Francisco.

I have said these things about the magni-tude of the continent and given you a few specimens of some of its wonders to let you know the comprehensiveness of the text when it says that Christ is going to have dominion from sea to sea; that is, from the Atlantic to the Pucific. Beside that, the saivation of this continent means the salva-tion of Asia, for we are only thirty-six miles from Asia at the Northwest. Only miles from Asia at the Northwest. Only Behring Straits separates us from Asia, and these will be spanned by a great bridge be-fere another century closes, and probably long before that. The thirty-six miles of water between these two continents are not at all deep sea, but have three islands, and there are also shoals which will allow piers for bridges, and for the most of the way the water is only about twenty fathoms deep.

The Americo-Asiatic bridge which will yet span those straits will make America. Asia, Europe and Africa one continent. So you see America evangelized, Asia will be vangelized. Europe taking Asia from one side and America taking it from the other side. Our great-grandchildren will cross that bridge. America and Asia and Europe all one, what subtraction from the pangs of seasickness! and the prophecies in Revela-tion will be fulfilled, "There shall be no more sea." But do I mean literally that this American continent is going to be all gospelized! I do. Christopher Columbus, when he went ashore from the Santa Maria, and his second brother Alonso, when he went ashore from the Pinta, and his third brother Vinceut, when he went ashore from the Nina, took possession of this country in name of the Father, and the Son and the Holy Ghost.

Satan has no more right to this country than I have to your pocketbook. To hear him talk on the roof of the temple, where he proposed to give Christ the kingdoms of this world, and the glory of them, you might suppose that Satan was a great capitalist or that he was loaded up with real estate, when the old miscreant never owned an acre or an inch of ground on this planet. For that reason I protest against something I heard and saw this summer and other summers in Montana and Oregon and Wyo-ming and Idaho and Colorado and California. They have given devilistic names to many places in the West and Northwest.

As soon as you get in Yellowstone Park or California you have pointed out to you places cursed with such names as "The Devil's Slide," "The Devil's Kitchen," "The Devil's Thumb," "The Devil's Pulpit," "The Devil's Mush Pot," "The Devil's Tes Kettle," "The Devil's Saw Mill," "The Devil's Machine Shop," "The Devil's Gate," and so on. Now it is very much needed that the geological surveyor or Con gressional committee or group of distin-guebed tourists go through Montaea and Wyoming and California and Colorado and give other names to these places. All these regions belong to the Lord and to a Chris-

But how is this continent to be gosp But how is this continent to be gospelled:
The pulpit and the Christian printing press
harnessed together will be the mightlest
team for the first plow. Not by the power
of cold, formalistic theology, not by ecclesiastical technicalities. I am sick of them and the world is sick of them. But it will be done by the warm-hearted, sympathetic presentation of the fact that Christ is ready done by the warm-hearted, sympathetic presentation of the fact that Christ is ready to pardon all our sins and heal all our wounds and save us both for this world and the next. Let your religion of gizciers crack off and fall into the Gulf stream and get melted. Take all your creeds of all denominations and dropout of them all human phraseology and put in only scriptoral phraseology and you will see how quick the people will jump after them.

On the Columbia River a few days ago we saw the salmon jump clear out of the water in different places, I suppose for the purpose of getting the insects. And if when we want to fish for men we could only have the right kind of balt, they will apring out above the flood of their sins and sorrows

Hanging over one of the cifff I looked off to reach it. The Young Men's Christian to roseh it. The Young Men's Christian Associations of America will also do part of the work. All over the continent I saw this summer their new buildings arising. In Van-ouver's I asked: "What are you going to put on that sightly piace?" The answer was: "A Young Men's Christian Association building." At Lincoln, Neb., I said: "What are they making those excavations for!" Answer: "For our Young Men's Christian Association building." At Des Mones, Ia, I saw a noble structure rising, and I asked for what purpose it was being and I asked for what purpose it was being built, and they told me for the Young Men's Christian Association.

built, and they told me for the Young Men's Christian Association.

These institutions are going to take the young men of this nation for God. These institutions seem in better favor with God and man than ever before. Business men and capitalists are awaking to the fact that they can do nothing better in the way of the fact that they can do nothing better in the way of tiving boneficence or in last will and testa-mont than to do what Mr. Marquand tid for Brooklyn when he made our Young Men's Christian Palace possi-ble. These institutions will get our young men all over the land into a stamble. These institutions will get our young men all over the land into a stampede for Heaven. Thus we will all in some way help on the work, with your ten talents, I with five, somebody else with three. It is astimated that to irrigate the arid and desert lands of America as they ought to be irrigated it will cost about one hundred million dollars to gather the waters into reservoirs. As much contribution and effort as that would irrigate with gospel influences all the waste places of this continent. Let us by prayer and contribution and right living all help to fill the reservoirs. You will carry a bucket and you a cup, and even a thimbleful would help. And after a while God will send the floods of mercy so gathered, pouring down over all the land, and some of us on earth and some of us in Heaven will sing with Isaiah: "In the wilderness waters have broken out and streams in the desert," and with David: "There is a river the streams whereof shall make glad the sight of God." O, fill up the reservoirs! America for God!

FAMILY STANDARDS.

What Makes the Training of Children of Such Great Responsibility. No stream can flow higher than its source. The combined honesty of any family will not be higher than the laws governing its

The individual who was born and trained in a family where strict integrity and truth were unknown has that much harder battle to fight in overcoming the tendencies of his asture. It is this that makes the training of young children such a tremendous reponsibility.

Is there a sadder sight than the puzzles

is there a sadder sight than the purifical expression of a child's face when the mother whom it leves with the whole strength of its being utters a social falsehood in its presence? and yet it is not so rare a sight as it should be. Can there be a standard of truth in a family where the daily life of the fruith in a family where the cally life of the family is an untruth, where the effort to ap-pear is far greater than the effort to be! To give a child the right standards there must be harmony in his life, and there can be no harmony without truth. The small boy in an infant class struck the very foun-fations of life when he exclaimed to a little girl covered with shame and confusion be-sause her cap had been knocked off, re-vealing a smoothly-cropped head and the row of ouris sewed fast to the ruches of the sap on the floor: "Ha! ye needn't be so shamed if ye hadn't made believe!" It is the "make believes" that cause the mortification. The man whose house is built on the rock truth has a sure foundation; he the rock truth has a sure foundation; he commands respect without question, and need fear no man's comment. "Electricity an not follow a broken wire, nor success a tying life." "I teach my children to apeak the truth" is but a small part of a moral sducation. Are they taught to live it! Is the home life, by example as well as precept, a life of truth! Within a few days the names have recorded five heavy comthe papers have recorded five heavy em bezzlements. The principals concerned as far as their histories have been re-vealed, were men who had peculiar social advantages; at least three of them were born into homes of wealth, and all were men who had had every educational advantage. The partner of one said : "I "always knew he was careless, but supposed he was honest." Will a strictly honest man be careless where money matters are involved? Will a man to whom truth is more than a tongue accomplishment be careless to criminality! You may say he is weak, but "there is a weakness that is as criminal as wickedness," and it is this weakness that is a sure indication of the lack of courage parable from truth.

Truth, like love, is universal in its meanings, and a love of it, devotion to it, is a perfect equipment for all of life's battles.— Christian Union.

Genuine Recuperative Rest.

Not absolute inaction, but a change of modes of action, is recuperative rest to a man in his waking hours. He who would be refreshed for renewed intellectual activities by an intermission of his ordinary oc-supation, must see to it that his brain is kept at work in another direction during that interval, or he will return to his old duties with less power than before for the performance of those duties. To expect to gain strength in one's intellectual faculties by an entire cessation of their use for weeks ogether, is as unreasonable as it would be to expect to gain muscular power by re-fusing to use the muscles for the same length of time, or to gain skill in musical execution by refraining for an extended period from all musical practice. If, indeed, a man were to intermit all intellectual activities during any one mouth, or two months of the year, it would be an impossibility for him to come back to his work at the end of that time as well fitted for it as when he left it for this period of enervating idleness. Recuperative rest is desirable for every hard-worked man or weman; but recupera-tive rest in one's waking hours can come only through a change of work, never through an absolute cossation of work.—S.

The Census of 1790.

Among the original documents preserved in the Interior Department in Washington the most interesting are the Books of the census of 1790, about twenty-five of which, hardly averaging the size of an encyclope-ila, are safely stored where lock and key protect them from the casual visitor. The most striking feature of these books is the most striking feature of these books is the remarkable legible writing with which the founders of the republic recorded the name of every head of a household in the United States. The causus-takers of that period did not use printed forms on which to tabulate this information, but ruled blank books from blank paper, which they bound by inclosing within old covers of books the leaves of which had been cut out. However gradely these books are shown to be made there is not one instance in which careless work can be charged, and in no case was there any eleventiness of permanship.—Washington Star.

Col. Clark.

U S. Army, waiter: For the last two rears, my health has been excellent; this, I think, is due to my using Sulphur Bitters, as formerly my health was miserable, owing to the frequent changes of climate, etc., so incident to a soldier's life.

Renews Her Youth

Phoebe Chealey, Peterson, Clay Co. Iowa, tells the following remarkable story the truth of which is vouched for by the residents of the town: "I am 73 years old, have been troubled with kidney complaint and lameness for many v-ars; could not dress myself without belp. Now I am free from all pain and soreness and am able to do all my own housework. I owe my thanks to Electric Bitters for having renewed my youth and removed completely all disease and pain." RECTAL DISEASES!

Dr. A. E. Elliott's

Method of RECTAL Treatment

PERMANENTLY CURES

Piles, Fistula in Ano, Fissure in Ano, Pruritis, or itching piles and Rectal Ulcer without the Knife, Ligature or Cautery.

Rectal Ulceration is the mos dangerous of all rectal maladies owing to its underminialize thetem before its victims realize their danger, the absence of pain being due to the scarcity of nerves in that portion of the rectum mostly

Symptoms of Rectal Ulcer.

Pain or weakness across lower portion of back, often referred to kidney troubles, burning in rectum after stool, itching about anus, st-tended with a moisture caused by discharge from ulcer, constitution sometimes attended with spells of diarrhos, finally resulting in chronic diarrhos, when the disease is almost beyond cure, but if not too long neglected may yet be cured; mucous and bloody discharge from rectum, soreness through bowels extending to stomach causing dyspepsia; in females frequently vaginal and u-rine inflammation resulting in lencorrhoa and ulceration.
